Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/16/2011 has been entered.

Response to Arguments

Applicant's arguments, see Remarks, filed 6/16/2011 and 7/27/2011, with respect to claims 13, 17, 19-20, 24, 41-42, 45-46, and 49-51 have been fully considered and are persuasive. The previous grounds of rejection have been withdrawn.

Authorization for this examiner's amendment was given in a telephone interview with Gary Yacura (Reg. No. 35,416) on 7/28/2011.

In the claims:

In claim 24, please replace the recitation "*The method of claim 23*" with -- *The method of claim 20* --.

In claim 45, please replace the recitation "*The apparatus of claim 44*" with -- *The apparatus of claim 42* --.

Allowable Subject Matter

Claims 13, 17, 19-20, 24, 41-42, 45-46, and 49-51 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims 13, 20, 42, and 49.

Regarding independent claim 13, the prior art taken either singularly or in combination fails to anticipate or fairly suggest a method of forming a recording medium, comprising: forming an information area for recording disc management information and/or data; recording disc identification information identifying a type of computer readable medium in an area preceding the lead-in area, ***the type being selected from a set of media types, the set of media type including Read-only, Recordable and Rewritable type; and the disc identification information being formed as a physical mark, the physical mark being a pit type, the pit type selected from at least one of wobbled pits and straight pits, wherein the physical mark provides control information for controlling a reproduction of data recorded as straight pits on a data area of the recording medium and is formed along a modulated unique pattern, wherein if the pit type is wobbled pits, at least a part of***

the wobbled pits forming the physical mark is shifted from a central line of the wobbled pits, and wherein the modulated unique pattern represents encryption information used in encrypting data of the data area.

Regarding independent claim 20, the prior art taken either singularly or in combination fails to anticipate or fairly suggest a method of reproducing data from a recording medium, including a lead-in area, a data area and a lead-out area, comprising: ***detecting physical mark information recorded as a pit type from an area preceding the lead-in area, the physical mark information representing disc identification information identifying a type of computer readable medium, the pit type having been selected from at least one of wobbled pits and straight pits in the area preceding the lead-in area that is not writable by end user recorders, the type being selected from a set of media types, the set of media types including one of Read-Only, Recordable, and Rewritable type, the physical mark information being formed along a modulated unique pattern, wherein if the pit type was wobbled pits, at least a part of the wobbled pits forming the physical mark information is shifted from a central line of the wobbled pits***; and controlling a reproduction of data recorded as straight pits from the data area based on the detected physical mark information.

Regarding independent claim 42, the prior art taken either singularly or in combination fails to anticipate or fairly suggest an apparatus for reproducing data from a recording medium including a lead-in area, a data area and a lead-out area, comprising: ***an optical pickup configured to detect physical mark information recorded as a***

Art Unit: 2627

pit type from an area preceding the lead-in area, the physical mark information representing disc identification information identifying a type of recording medium, the pit type selected from at least one of wobbled pits and straight pits in the area preceding the lead-in area that is not writable by end user recorders, the type being selected from a set of media types, the set of media types including one of Read-Only, Recordable and Rewritable type, the physical mark information being formed along a modulated unique pattern, wherein if the pit type is wobbled pits, at least a part of the wobbled pits forming the physical mark information is shifted from a central line of the wobbled pits; and a controller configured to control a reproduction of data recorded as straight pits from the data based on the detected physical mark information.

Regarding independent claim 49, the prior art taken either singularly or in combination fails to anticipate or fairly suggest a method of forming a recording medium, comprising: ***forming an information area for recording disc management information and/or data; and forming physical mark information as a pit type, the pit type selected from at least one of wobbled pits and straight pits in an area preceding a lead-in area of the recording medium, wherein the physical mark information provides control information for controlling a reproduction of data recorded as straight pits on a data area of the recording medium and is formed along a modulated unique pattern, wherein if the pits type selected is wobbled pits, at least a part of the wobbled pits forming the physical mark information wobble in a non-overlapping manner with respect to a central line of the wobbled***

pits, and wherein the modulated unique pattern represents encryption information used in encrypting data of the data area, the physical mark information identifying a type of the recording medium, the type being selected from a set of media types, the set of media types including one of Read-Only, Recordable, and Rewritable.

Dependent claims 17, 19, 24, 41, 45, 46, 50, and 51.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sako (US PgPub 2002/0181705) discloses a data output method. Yamaguchi et al (US PgPub 2002/0015379) discloses an optical recording medium. Yamada (US PgPub 2003/0218950) discloses a reproducing apparatus. Kadowaki et al. (US PgPub 2004/0001414) discloses a storage medium. Takemura et al. (US 5,809,007) discloses an optical disk.
